## Summary

---

Associate Software Engineer with 2+ years of experience in designing and automating software solutions, ensuring high-quality deliverables through efficient coding and testing practices.

## Experience

---

**Associate Software Engineer**, Nextrics Software Solutions May 2023 – Present

- Collaborated with development and product teams to define test requirements and create detailed test plans, ensuring 100% coverage of functional specifications.
- Designed, executed and maintained manual and automated test cases using Selenium, TestNG and Java, achieving a defect detection rate 98% before production release.
- Regression, integration and performance testing, reducing post-release defects by 35% and improving the stability of the product.
- Documented defects, prepared test reports and participated in defect triage meetings, ensuring 95% critical bugs were resolved within SLA.

## Projects

---

**The Internet.Herokuapp.com**, Open Source Testing Environment github.com

- Built a Maven-based Selenium WebDriver automation framework in Java with TestNG and Page Object Model (POM), integrated Extent Reports for reporting, and automated 10+ real-world scenarios on the practice site the-internet.herokuapp.com.
- **Technologies used: Selenium WebDriver, Java, TestNG, and Maven**

**Personal Portfolio Website** Portfolio.com

- Designed and developed a fully responsive personal portfolio website optimized for desktop and mobile devices, enhancing user experience with seamless navigation and boosting project inquiries by 40%.
- Implemented automated testing for core functionalities including navigation, contact form, services, and about sections to ensure reliability and performance.
- **Technologies used: HTML, CSS, JavaScript, GitHub, Vercel**

## Technologies

---

**Languages:** C and Java

**Automation Tools:** Selenium WebDriver, Eclipse

**Build and CI/CD Tools:** Maven, GitHub Actions

**Test Frameworks:** TestNG, JUnit

**Version Control:** Git, GitHub

**Manual Testing:** Functional Testing, Regression Testing

## Certifications

---

**Web Fundamentals** - TryHackMe.com February 2023

- Covered core concepts of HTTP, HTML, CSS, JavaScript, client-server architecture, and web vulnerabilities, enhancing skills in web application understanding, UI testing, and security validation.

**Pre Security** - TryHackMe.com January 2023

- Completed foundational training in networking, Linux/Windows operations, and web fundamentals, gaining essential knowledge for secure test automation and vulnerability awareness.

## Education

---

**Tirumala Engineering College**, Bachelor's in Information Technology April 2019 – May 2023

- Developed strong foundations in software development.
- **Coursework:** Java Programming, Web Fundamentals, Software Testing
